

The Future of Campus Vending

> It's Whats Healthy

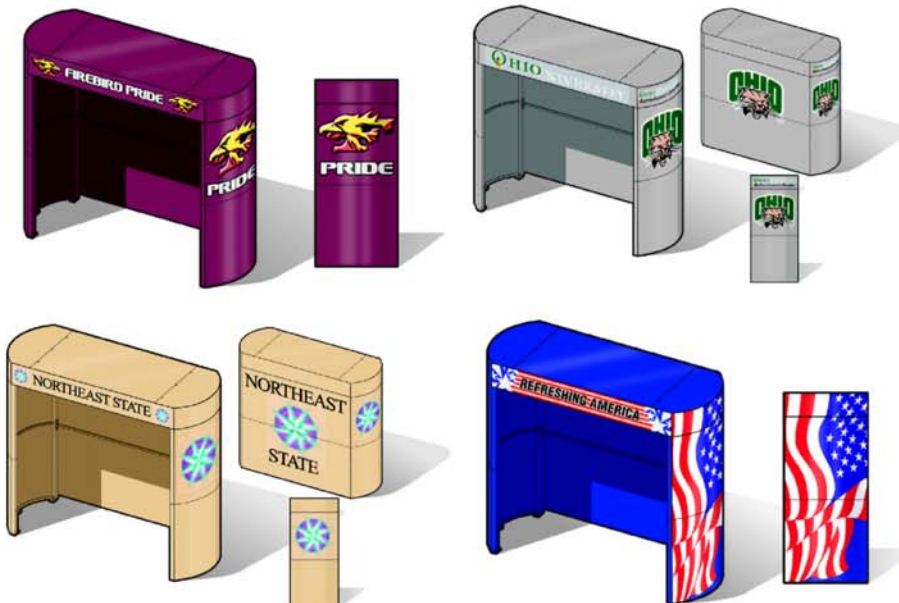

Nestle Water has teamed up with Icon Enclosures to provide a professional alternative for vending services in the education environment. Healthy products combined with state of the art equipment including the "Refreshment Center". Please call us and we will be happy to come visit and further explain the many benefits of this program.

Refreshment Center Graphic Kits That Promote Your School!

All Graphic Kits are produced to fit your particular needs and specifications. Your Graphic Kits are shipped to you pre-installed on your Refreshment Center.

See reverse side for further details >>

Security and Aesthetics

Options

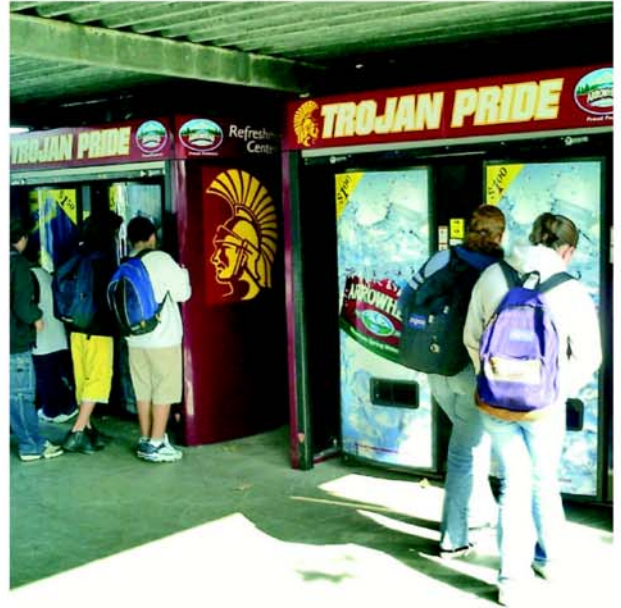

We offer schools a wide range of security and cosmetic products for their vending needs. From the "Sentry" to the innovative "Refreshment Center", our goal is to provide safe, secure and attractive vending centers for your school. Our products are tested in the real world. You can be confident that an investment in our products will increase sales and protect your assets.

Placement flexibility

This has always plagued the vending industry. The sole purpose of vending machines is to provide a convenient source of products to the public. The Refreshment Center allows placements in the highest traffic areas. Your machines can be free-standing along sidewalks, parking lots, athletic fields, buildings, etc. The Refreshment Center can also be bolted back to back creating free-standing vending centers or installed indoors as an area treatment. High visibility locations also deter vandalism and theft.

Security

Security and protection from the elements with aesthetically pleasing products. Icon Enclosures provides unsurpassed security features to protect your equipment from vandals and thieves. Customized Graphic Kits allow schools to attractively promote themselves in many ways.
